## ROEQ TR1000 Top Roller

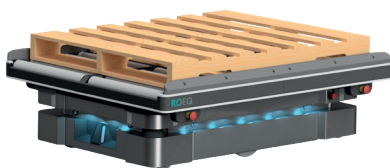

The TR1000 is developed to support heavy internal logistics in industrial facilities. The basic functionality of the TR1000 is to perform automated load and unload operations. The design enables safe and reliable transportation of goods with varying footprint.

With TR1000 the MiR1000 is able to carry out scheduled pick-up and delivery tasks with many different types of heavy goods.

The standard TR1000 is fixed in height 420 mm/16.53 inches. Optionally the TR1000 can be delivered with fully automated lifter functionality for pick-up and delivery of goods in heights from 600 mm/23.62 inches to 750 mm/29.52 inches.

### This is how the ROEQ TR1000 works

TR1000 carries various sizes of goods. Including US pallets.

The TR1000 is optionally delivered with an automatic height adjustment solution, which gives the opportunity to collect and deliver in different heights.

Automated height adjustment from 600 mm/23.62 inches to 750 mm/29.52 inches.
